NEW QUESTION: 3

1. Determine and download recommended UCS firmware required.
 2. Determine and download recommended VCenter required.
 3. Determine and download virtual machine OS' required.
 4. Download service profile templates.
 5. Determine and download recommended hypervisor.

Answer: A

Explanation:

Instead export the client certificate from Computer1 and install the certificate on Computer2.

Note: Each client computer that connects to a VNet using Point-to-Site must have a client certificate installed. You generate a client certificate from the self-signed root certificate, and then export and install the client certificate. If the client certificate is not installed, authentication fails.
