Each version's using method and functions are different and the client can choose the most convenient version to learn our 3V0-51.20N exam materials, You also don't worry about the time difference.

As the certification has been of great value, a right 3V0-51.20N exam guide can be your strong forward momentum to help you pass the exam like a hot knife through butter.

**NEW QUESTION: 1**

Which of the following is a valid use of the `if` statement in a script? (Select one.)

A. `if (condition) { do something; }`

B. `if (condition) do something;`

C. `if condition { do something; }`

D. `if condition do something;`

**Answer: B**

**NEW QUESTION: 2**

Why is business and IT alignment so important to SOA?

A. Business and IT can decide which vendors to use and which business functions to outsource.

B. Business and IT can collectively fulfill the business needs and goals.

C. Applications can be rewritten to suit the needs of the business.

D. It allows for a significant investment in technology and hardware.

**Answer: B**

**NEW QUESTION: 3**

Which statement is true about portals in FileMaker Pro 12?

A. Conditional formatting can be applied to a portal row.

B. Records in a portal can become unsorted if the developer unchecks "Keep records in sorted order" in the Portal Setup > Sort Records dialog.

C. A portal set with only a bottom anchor containing fields set with only a top anchor will increase row height as the layout is expanded vertically.

D. An `OnObjectEnter` script trigger applied to a portal will activate once for each portal row as a user tabs from field to field across rows.

E. If there are multiple portals on a layout, the `Go to Portal Row [First]` script step will activate the portal closest to the top left corner of the layout.

**Answer: D**

**NEW QUESTION: 4**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

Your network contains an Active Directory domain named contoso.com. The domain contains a DNS server named Server1. All client computers run Windows 10. On Server1, you have the following zone configuration.

You need to ensure that all of the client computers in the domain perform DNSSEC validation for the fabrikam.com namespace.

Solution: From a Group Policy object (GPO) in the domain, you add a rule to the Name Resolution Policy Table (NRPT).

Does this meet the goal?

A. No

B. Yes

**Answer: B**

Explanation:

The NRPT stores configurations and settings that are used to deploy DNS Security Extensions (DNSSEC), and also stores information related to DirectAccess, a remote access technology.

Note: The Name Resolution Policy Table (NRPT) is a new feature available in Windows Server 2008 R2. The NRPT is a table that contains rules you can configure to specify DNS settings or special behavior for names or namespaces. When performing DNS name resolution, the DNS Client service checks the NRPT before sending a DNS query. If a DNS query or response matches an entry in the NRPT, it is handled according to settings in the policy. Queries and responses that do not match an NRPT entry are processed normally.
