**NEW QUESTION: 2**

DRAG DROP You are designing a SQL Server Integration Services (SSIS) package. The package moves order-related data to a staging table named Order. Every night the staging data is truncated and then all the recent orders from the online store database are inserted into the staging table. Your package must meet the following requirements:

If the truncate operation fails, the package execution must stop and report an error.

If the Data Flow task that moves the data to the staging table fails, the entire refresh operation must be rolled back.

For auditing purposes, a log entry must be entered in a SQL log table after each execution of the Data Flow task.

The TransactionOption property for the package is set to Required. You need to design the package to meet the
