- D. 172.23.103.10

**Answer: B**

### **NEW QUESTION: 3**

Note: This question is part of a series of questions that use the same set of answers choices. An answer choice may be correct for more than one question in the series.

You administer a Microsoft SQL Server server that hosts a transactional database and a reporting database. The transactional database is updated through a web application and is operational throughout the day. The reporting database is only updated from the transactional database.

The recovery model and backup schedule are configured as shown in the following table:

At 16:20 hours, you discover that pages 17, 137, and 205 on one of the database files are corrupted on the transactional database.

You need to ensure that the transactional database is restored. You also need to ensure that data loss is minimal.

What should you do?

- A. Restore the latest full backup, and restore the latest differential backup. Then, restore each log backup taken before the time of failure from the most recent differential backup.
- B. Restore the latest full backup, and restore the latest differential backup. Then, restore the latest log backup.
- C. Restore the latest full backup. Then, restore each differential backup taken before the time of failure from the most recent full backup.
- D. Restore the latest full backup.
- E. Restore the latest full backup. Then, restore the latest differential backup.
- F. Perform a page restore.
- G. Perform a point-in-time restore.
- H. Perform a partial restore.

**Answer: F**

Explanation:

Requirements for Restoring Pages

A page restore is subject to the following requirements:

Bulk-logged Recovery Model and Page Restore

For a database that uses the bulk-logged recovery model, page restore has the following additional conditions:
