**Answer:**
Explanation:

Note: With Azure, built-in intelligence is within the reach of all app developers. Enable your serverless code or logic to use Machine Learning and Cognitive Services.
Box 1, Identify users by face: Azure Cognitive Services

Microsoft Face API, a cloud-based service that provides the most advanced face algorithms.
Face API has two main functions: face detection with attributes and face recognition.
Box 2, Provide text-to-speech services: Azure Cognitive Services
Infuse your apps, websites and bots with intelligent algorithms to see, hear, speak, understand and interpret your user needs through natural methods of communication.
Example:
Speech: Convert spoken audio into text, use voice for verification, or add speaker recognition to your app.
Box 3, Read questions to users: Azure Functions
Azure Functions is a serverless solution.

**NEW QUESTION: 2**
Refer to the exhibit.

Which two statements about this route table are true? (Choose two.)
**A.** The OSPF routes with the IA flag have their administrative distances incremented as they leave the router.
**B.** The BGP routes are external.
**C.** The BGP routes are internal.
**D.** The OSPF routes with the E2 flag have their metrics incremented as they leave the router.
**E.** The OSPF routes with the E2 flag retain the same metric as they leave the router.
**Answer: C,E**
Explanation:
IBGP routes have an Administrative distance of 200, while EBGP have an AD of 20. Here we see that the BGP routes have an AD value of 200. With OSPF, external routes fall under two categories, external type 1 and external type 2. The difference between the two is in the way the cost (metric) of the route is being calculated. The cost of a type 2 route is always the external cost, irrespective of the interior cost to reach that route. A type 1 cost is the addition of the external cost and the internal cost used to reach that route. The metric for E2 routes do not change when advertising to other routers.

**NEW QUESTION: 3**
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not

appear in the review screen.
