NEW QUESTION: 1

- A. Option A
- B. Option C
- C. Option D
- D. Option B

Answer: C

NEW QUESTION: 2

You need to configure the Edit Metadata module so that the structure of the datasets match.

Which configuration options should you select? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Box 1: Floating point

Need floating point for Median values.

Scenario: An initial investigation shows that the datasets are identical in structure apart from the MedianValue column. The smaller Paris dataset contains the MedianValue in text format, whereas the larger London dataset contains the MedianValue in numerical format.

Box 2: Unchanged

Note: Select the Categorical option to specify that the values in the selected columns should be treated as categories.

For example, you might have a column that contains the numbers 0,1 and 2, but know that the numbers actually mean "Smoker", "Non smoker" and "Unknown". In that case, by flagging the column as categorical you can ensure that the values are not used in numeric calculations, only to group data.

NEW QUESTION: 3

Random prefixes on folders in S3 ensure higher throughput on read and write in S3.

Choose the correct answer:

A. True

B. False

Answer: A

Explanation:

If you introduce some randomness in your key name prefixes, the key names, and therefore the I/O load, will be distributed across more than one partition. If you anticipate that your workload will consistently exceed 100 requests per second, you should avoid sequential key names. If you must use sequential numbers or date and time patterns in key names, add a random prefix to the key name. The randomness of the prefix more evenly distributes key names across multiple index partitions. Examples of introducing randomness are provided later in this topic.

NEW QUESTION: 4

Your client is looking for a way to increase the quality of leads that are being passed from marketing to sales.

What advice do you offer?

A. Add more landing pages and forms to your site to increase the number of conversion opportunities.

B. Only pass on leads that are very active on your site no matter the company profile.

C. Automatically assign all leads to sales reps in a

round-robin system.

D. Implement a blended lead scoring and grading system.

Answer: D
