You develop a SQL Server Integration Services (SSIS) package that imports Windows Azure SQL Database data into a data warehouse every night.

The Windows Azure SQL Database data contains many misspellings and variations of abbreviations. To import the data, a developer used the Fuzzy Lookup transformation to choose the closest-matching string from a reference table of allowed values. The number of rows in the reference table is very

If no acceptable match is found, the Fuzzy Lookup transformation passes a null value.

**D.** Decrease the maximum number of matches per lookup.

**Answer: B**

Explanation:
