Answer:
Explanation:

Explanation

Box 1: Yes.
User1 is in a group named Compliant. All the conditional access policies apply to Group1 so they don't apply to User1. As there is no conditional access policy blocking access for the group named Compliant, User1 is able to access Appl using any device.

Box 2: Yes.
User2 is in Group1 so Policy1 applies first. Policy1 excludes compliant devices and Device1 is compliant. Therefore, Policy1 does not apply so we move on to Policy2. User2 is also in Group2. Policy2 excludes Group2. Therefore, Policy2 does not apply so we move on to Policy3. Policy3 applies to Group1 so Policy3 applies to User2. Policy3 applies to 'All device states' so Policy3 applies to Device1. Policy3 grants access. Therefore, User2 can access Appl using Device1.

Box 3: No.
User2 is in Group1 so Policy1 applies. Policy1 excludes compliant devices but Devices is non-compliant. Therefore, User2 cannot access Appl from Device2.
