Topic 2, Web ApplicationBackground

You are developing an online shopping web application.

Business Requirements

- * A user is not required to provide an email address. If a user enters an email address, it must be verified to be a valid email address.

- * Information about the first product on the product page must fade out over time to encourage the user to continue browsing the catalog.

- * Administrators must be able to edit information about existing customers.

- * Administrators also must be able to specify a default product on the product page.

Technical Requirements

General:

- * The web store application is in a load-balanced web farm. The load balancer is not configured to use server affinity.

- * The web store application is an ASP.NET MVC application written in Visual Studio 2012.

Products:

- * The value of the productId property must always be greater than 0.
- * The Products page for mobile devices must display to mobile users. The Products page for desktop devices must display to desktop users.

Storage:

- * The data must be stored in a serialized XML data format.
- * Serialized objects must be schema-independent.

Exception handling:

- * Exceptions originating from IIS must display a page with support contact information.
- * Some page links expire, and users who access these links encounter 404 errors.
- * Exceptions must be logged by using the WriteLog method of the Utility class.

Browser and device support:

- * The application must support image format conversions from .bmp to .jpeg for mobile devices.
- * The application must support image format conversions from .bmp to .png for desktop devices.
