NEW QUESTION: 1

A company that is a leading provider of training delivers courses to students globally. The company decided to use customer community in order to allow student to log in to the community, register for courses and pay course fees. The company has a payment gateway that takes more than 30 seconds to process the payment transaction. Students would like to get the payment result in real-time so in case an error happens, the

students can retry the payment process.

What is the recommended integration approach to process payments based on this requirement?

- A. Use platform event to process payment to the payment gateway.
- B. Use continuation to process payment to the payment gateway.
- C. Use change data capture to process payment to the payment gateway.
- C. Use request and reply to make an API call to the payment gateway.

Answer: B

NEW QUESTION: 2

Welches der folgenden BEST-Verfahren stellt die Integrität des Betriebssystems eines Servers sicher?

- A. Festlegen eines Startkennworts
- B. Aktivitätsprotokollierung implementieren
- C. Härten der Serverkonfiguration
- D. Schützen Sie den Server an einem sicheren Ort

Answer: C

Explanation:

Erläuterung:

Das Absichern eines Systems bedeutet, es auf die sicherste Weise zu konfigurieren (neueste Sicherheitspatches installieren, die Zugriffsberechtigung für Benutzer und Administratoren ordnungsgemäß definieren, unsichere Optionen deaktivieren und nicht verwendete Dienste deinstallieren), um zu verhindern, dass nichtprivilegierte Benutzer das Recht erhalten, privilegierte Anweisungen auszuführen. Übernehmen Sie die Kontrolle über die gesamte Maschine und gefährden Sie die Integrität des Betriebssystems. Der Schutz des Servers an einem sicheren Ort und das Festlegen eines Startkennworts sind bewährte Methoden, stellen Sie jedoch nicht sicher, dass ein Benutzer nicht versucht, logische Schwachstellen auszunutzen und das Betriebssystem zu gefährden. Die Aktivitätsprotokollierung weist in diesem Szenario zwei Schwachstellen auf: Es handelt sich um eine Detektivkontrolle (keine präventive), und der Angreifer, der bereits über Berechtigungen verfügt, kann Protokolle ändern oder deaktivieren.

NEW QUESTION: 3

A consultant is at a customer's site and is required to make a change. The consultant needs to backup the existing situations with which command?

- A. itmcmd execute bulkExportSit
- B. tacmd execute bulkExportSit
- C. itmcmd bulkExportSit
- D. tacmd bulkExportSit

Answer: D

NEW QUESTION: 4
