NEW QUESTION: 1

You are the project manager for your organization. You have been recording the actual results of activity duration for your project. Many of the results are late and this is causing your project to be late on reaching its milestones. What tool and technique can you use as a part of controlling the schedule to help you review various scenarios to bring the schedule into alignment with the plan?

- A. Root cause analysis
- B. Resource leveling
- C. What-if scenario analysis
- D. Schedule analysis

Answer: C

Explanation:

Explanation/Reference:

Explanation:

Of all the choices, the what-if scenario analysis allows you to determine the best approach to bring the schedule back into alignment with the project plan. What-if scenario analysis explains the analysis of the question "What if the situation represented by scenario 'X' happens?". This What-If Scenario Analysis shortly named as WIS A schedule network analysis is performed using the schedule to compute the different scenarios, such as extending specific engineering durations, or delaying a major component delivery. Businesses use what-if

scenarios to determine the effect different costs or investments have on profit and other financial indicators.

Incorrect Answers:

B: Root cause analysis could help you determine the reasons why the project is running late, but it is not the best choice for this question as it is not a control schedule process tool and technique.

C: Schedule analysis is the review of the schedule, but does not examine other possibilities for completing the project work.

D: Resource leveling can cause your project's duration to increase.

NEW QUESTION: 2

The IT manager is asking the wireless team to get a report for all guest user associations during the past two weeks. In which two formats can Cisco Prime save this report? (Choose two.)

- A. DOC
- B. CSV
- C. plain text
- D. PDF
- E. XLS

Answer: B,D

Explanation:

NEW QUESTION: 3

A company is deploying Windows Server 2008 R2 Remote Desktop services (RDS).

Another administrator has installed RDS client access licenses (CALs) on the Remote Desktop license server.

You need to ensure that the Remote Desktop Session Host (RD Session Host) server requests licenses from the Remote Desktop license server.

What should you do first?
