NEW QUESTION: 3

Detection capabilities of Host-based ID systems are limited by the incompleteness of which of the following?

- A. Audit log capabilities
- B. Audit notification capabilities
- C. Event capture capabilities
- D. Event triage capabilities

Answer: A

Explanation:

This is one of the weakest point of IDS systems installed on the individual hosts. Since much of the malicious activity could be circulating through the network, and this kind of IDS usually have small logging capabilities and of local nature. So any activity happening in the network could go unnoticed, and intrusions can't be tracked as in depth as we could with an enterprise IDS solution providing centralized logging capabilities.
