NEW QUESTION: 2

You are working with a customer to migrate them to an Avaya Midsize solution with IP Office. They have nine existing analog trunks that each cost \$40 per month. You want to determine if it would be cost effective to go to digital trunking using a T1/E1 at a cost of \$400 per month.

Although the analog monthly line charges are less, what else would need to be taken into consideration to look at the total cost difference?

A. Digital trunking requires an SBCE for security.

B. Digital trunking needs VCM channels and analog trunks do not-

C. The cost for nine analog trunk ports versus a single digital trunk port.

D. Analog devices, such as a classic fax machine, attached to the IP Office require analog trunks.

Answer: D

NEW QUESTION: 3

CORRECT TEXT

The following image properties are displayed on your system:

Which two options describe the boot environment policy property that is currently set for this image?

All package operations are performed in a new BE set as active on the next boot.

Do not create a new BE. The install, update, uninstall, or revert operation is not performed if a new BE is required.

If a BE is created, do not set it as the active BE on the next boot

A reboot is required for all package operations

A reboot is not required after a package operation.

For package operations that require a reboot, this policy creates a new BE set as active on the next boot.

Answer:

Explanation:

D,

F

image properties described below.

* be-policy

Specifies when a boot environment is created during packaging

operations. The following values are allowed:

/ default

Apply the default BE creation policy: create-backup.

/ always-new (D, F)

Require a reboot for all package operations (D) by performing them in a new BE set as active on the next boot (F). A backup BE is not created unless explicitly requested.

This policy is the safest, but is more strict than most sites need since no packages can be added without a reboot.

NEW QUESTION: 4

Universal Containers has Quote Terms specific to Product X and separate Quote Terms specific to Product Y.

The Admin has created an output document with separate Template Sections for each set of Quote Terms. Each Template Section references a separate Template Content record. Which tasks should the admin complete to ensure Quote Terms for Product X and Y appear separately in the output document?

- A.** Delete the second Template Section and set the Group field on the remaining Template Section to SBQQ__ProudctCode__c.
- B.** Set the Template Content field for all Product X Quote Terms to the Product X Template Content record; repeat for Product Y.
- C.** Set the Product X Template Section filter fields to Product Code = Product X; repeat for Product Y.
- D.** Create a Term Condition for all Product X Quote Terms where Section = Template Section X; repeat for Product Y.

Answer: C
