NEW QUESTION: 1

"Perform initial assessment." Identify the six sequential procedures.

A. Check for consciousness, check for signs of life, check for pulse, check for severe bleeding, tap/shake and inquire "Are you ok?", obtain consent.

B. Tap/shake and inquire, 'Are you ok?', obtain consent, check for signs of consciousness, check for signs of life, check for severe bleeding, check for pulse.

C. Check for consciousness, check for signs of life, check for severe bleeding, tap/shake and inquire "Are you ok?", obtain consent, check for pulse.

D. Check for severe bleeding, check for pulse, check for signs of life, obtain consent, check for consciousness, tap/shake and inquire "Are you ok?"

E. Tap/shake and inquire, "Are you ok?", check for consciousness, obtain consent, check for signs of life, check for pulse, check for severe bleeding.

Answer: E

NEW QUESTION: 2

HOTSPOT

Answer:

Explanation:

Explanation:

Box 1. A sliding Window

Box 2: A sliding Window

With a Sliding Window, the system is asked to logically consider all possible windows of a given length and output events for cases when the content of the window actually changes

- that is, when an event entered or existed the window.

NEW QUESTION: 3

Your network contains a Windows Server Update Services (WSUS) server.

All client computers are configured as WSUS clients.

All of the client computers have Windows Firewall enabled. Windows Firewall is configured to block File and Printer Sharing.

Users are not configured as local Administrators on their client computers.

You deploy System Center 2012 Configuration Manager.

You need to identify which methods you can use to deploy the Configuration Manager client to an of the client computers.

Which client installation methods should you identify? (Choose all that Apply.)

A. a logon script installation

B. a Client Push Installation

C. a manual client installation

D. a software update-based client installation

E. an Active Directory Group Policy-based installation

Answer: D

Explanation:

Windows Firewall is configured to block File and Printer Sharing.

logon script - Of course you can package the client and deploy it by login script, but that's not really the question.

manual client - Manual installation is possible with local admin rights. You could install it withRun as... but again not the question.

software update-based client -...this is the one...

Client Push - Client Push needs a firewall exception. GPO - Installing via GPO needs a firewall exception
